

Liza Perrett

Liza is the Governance and Corporate Services Manager at Isaac Regional Council (IRC). Liza has over 23 years local government experience spanning over three Councils. She recently moved from the SEQ to Central Queensland, commencing with IRC in October 2015.

Liza has a Bachelor of Business and her work experiences cover governance, regional collaboration, customer service, change management, community services, human resources, financial management and business improvement. Liza has led complex organisational projects and change such as local government reform in 2008, establishing Logan's first Customer Service Branch, establishing and then dis-establishing Allconnex Water and, in earlier days, being part of the management team that established Queensland's first internet service provider in the mid 1990's.

Liza is passionate about working for local government, the closest level to the community, and implementing systems that are not only sustainable but flexible for all the organisation to perform their role. Liza is results and team focused, but can be relied upon to celebrate successes and have fun along the way.
